## Maintain the Quality of Alberta's Crops

### Better Seed means

### Better Yields — Better Grades — Better Prices

A special committee appointed by the Minister of Agriculture, with the cooperation of numerous organizations in the province, is preparing the use of this spring by farmers throughout the province of—

High quality, clean, treated, seed grain.  
In order to reduce the heavy annual losses sustained by sowing inferior seed.

#### Farmers can co-operate by

1. Using registered seed wherever possible
2. Having seed tested for germination and purity
3. Treating seed for smut
4. Thoroughly cleaning all grain intended for seed
5. Seedling only varieties of recognized quality and varieties suitable to the district

Good seed will be in demand this spring. Secure your requirements early—before the supply is exhausted

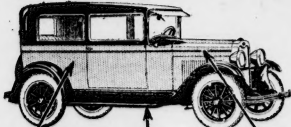

U. F. A. Local, Boards of Trade, The Wheat Pool, Banks, Commercial Grain Firms, the Press, and many other organizations are working in cooperation with a

### BETTER SEED COMMITTEE

consisting of representatives of the Provincial Department of Agriculture, the Dominion Seed Branch, the Canadian Seed Growers' Association, The Alberta Seed Growers' Association, the C. P. R. Agricultural Department and the University of Alberta.

D. A. McCall, Provincial Publicity Commissioner, Edmonton, Secretary

## THE HIDDEN PLACES WHERE QUALITY COUNTS MOST

**1 Body** The emblem "Body by Fisher" stands for modern styling, safe, substantial construction... lasting beauty, and a score of important contributions to your comfort.

**2 Chassis** Compare the "Bigger and Better" Chevrolet Chassis with any other car in the low-price field. Look at its rugged, big, deep steel frame, its sturdy cross members, its long semi-elliptic, shock-absorber springs, its safety gasoline tank in rear, its one-piece, hump-type rear axle of enormous strength and ready accessibility. Check the four-wheel braking system and the independent set of emergency brakes.

**3 Engine** Look beneath the stylish hood of the "Bigger and Better" Chevrolet. See that sturdy, valve-in-head engine (the most powerful type of automobile engine yet designed), fully enclosed and protected. Note the AC Oil Filter, the AC Air Cleaner, Crankcase Breather System, Oil Pump. Notice the new alloy "inboard" pistons, the new hydro-laminated camshaft gears... the high grade electrical equipment.

The G.M.A.C. General Motors' own deferred payment plan affords the most convenient and economical way of buying your Chevrolet on time.

## Claresholm Local News

Mrs. (De) Mullin is seriously ill at the present time.

Mrs. Jacobson is a patient in the local hospital this week.

Arthur Sundquist, of Stavely, is a patient in the local hospital.

The 14 months old child of Mr. and Mrs. Alex Hutchison is in the hospital, seriously ill.

Horn, at the local hospital, on April 28th, to Mr. and Mrs. Henry O'Kane, of Carmangay, a son.

Mayor Ringrose has declared next Monday a civic holiday, to spent as a general-cleanup day by the citizens.

Claresholm Odd Fellows will observe the anniversary of the founding of the order, on Sunday evening, May 6th, when they will attend services at St. John's church.

The past week, while not so warm as the previous week, has nevertheless been dry and favorable for farm work. Good progress has been made with seeding.

Mr. and Mrs. W. M. Cockburn left on Tuesday for their new home at Carp, Ontario, where Mr. Cockburn will have charge of Carleton county for the Ontario Department of Agriculture.

Considerable improvements are planned by the Elks for the sports track this season. Among other things a grand stand for the accommodation of baseball patrons. It is the intention to have this ready in time for May 24th.

The Elks sports committee is arranging for a sports day here on May 24th. It is expected to have a baseball game between Stavely and Claresholm, and a good program of other sports. There will be a big dance at night.

The dates of the short course at the School of Agriculture for winners at the various school fairs held last season in the southern districts, are announced for July 7 to 19. Letters of instruction concerning travel, equipment, etc., will be sent out to the scholarship winners shortly.

On Monday and Tuesday evenings to annual recitals by the pupils of W. G. Moffatt were held in the United church. With one hundred pupils, two nights were necessary to accommodate the many performers, as well as their many friends. Mr. Moffatt will send some of his pupils to compete in the forthcoming musical festival at Lethbridge.

**E. L. Lucken Drops Dead**

Word has just been received that E. L. Lucken, almost 70 years of age, dropped dead at the farm about 8 miles southwest of Stavely this afternoon, while at work in the field.

### Horticultural Society

There was a good attendance at the Horticultural Society meeting on Monday evening.

Mr. Bayfield's talk on fertilization was highly informative and was much appreciated by all present. Several questions were asked at the close of the talk which brought out more information.

The premiums, consisting of fine gladioli bulbs, were distributed.

**Pool Building Many Elevators**

Eighteen new country elevators are now under construction by the Alberta Wheat Pool. It is announced from the Pool head office in Calgary. Construction work is being carried on at Mornington, Gibbons, Ryley, Pickardville, Bruce, Daugh, Acadia Valley, Altex, Dewberry, Buffalo, Shepard, Cheadle, New Dayton, Hesketh, Vauxhall, Frerintosh, Armada and Bowden. In addition to the new buildings being erected, elevators have been purchased by the Pool from grain companies at the following points: Ellerslie, Bremner, Fern, Faber, Etanok, Duchess, Meniak and Gwynne.

### TOWN COUNCIL MEETING

Council met in regular session on Thursday evening. Present: Mayor Ringrose, Councillors Maxwell, Arnestad, Morrow, Watt and Hood.

Motion carried to sell to Christ Thompson lots 18 and 19 in block 77 for \$50. To R. A. Allen lots 19 and 20 in block 6 for \$40. To G. Erickson lot 3 in block B for \$50, providing a quit claim can be secured from the owner, who has a right of redemption.

O. Arnestad submitted rates and conditions in connection with public liability insurance.

The Golf Association was granted a renewal of lease on the golf course for five years at a rental of \$50 per annum.

Motion carried to lease lots 1 to 5 inclusive in block 5, to G. Erickson to be used as a camp ground.

The council agreed to consider the request of J. H. Bousquet for the town to furnish tile to drain his property.

The report of the auditor was read and approved.

The following estimates were passed for the year 1928:

Debitments \$5,700.00, Rink payments \$2,400.00, Salaries \$2,950.00, Office \$250.00, Postage, Printing and Stationery \$800.00, Legal \$100.00, Public Works \$7,000.00, Health \$350.00, Relief \$2,000.00, Police \$1,400.00, Street Lighting \$1,800.00, Fire \$1,200.00, Workmen's Compensation Board \$100.00, Tax discounts \$1,500.00, Grants \$1,250.00, Sundries \$500.00, Water Operation \$8,500.00.

By Water Receipts \$8,500.00, Tax Penalties \$400.00, Land Sales \$400.00, Licenses \$900.00, Rents \$100.00, Dog Taxes \$100.00, Bank Balance less debenture payment on January 1st, 1928, \$3,400.00.

Estimated for Debitments and Municipal Purposes \$22,600.00.

The requisition from the school board for 1928 is \$18,000.00 and the amount required for the Alberta Government for supplementary revenue is \$44.00.

The total assessment inside the town is \$844,085.00, and the total assessment on the farms outside the town limits but within School District No. 764 is \$653,625.00.

Bylaw 253 was passed imposing the following rates for 1928: Debitments 2 mills, General 22 mills, School 17 mills, Supplementary Revenue 1/2 mill, total 47 mills. School rate on farm lands outside, 8 mills.

Motion carried to allow a discount of 7 per cent for payment of taxes prior to August 31, and 2 per cent for payment during September.

Motion carried that the town pay to C. Rompin \$24 for board for Hugh Flood, for month of April.

Accounts totalling \$3,528.12 were passed for payment.

Motion carried that the two accounts of the Claresholm Hospital, against Mrs. Callahan and Leonard Smith, be not paid.

Millions and millions of dollars' worth of wealth belonging to the people of Canada have been lost because men thought camp fires would burn out of themselves. Sometimes they do. But if they don't we pay dear for it.

### LOCAL BOARD OF HEALTH

#### Order to Clean Up Premises

Public Notice is hereby given that all persons in the town of Claresholm are required to clean up their respective places by removing to the nuisance ground all rubbish and accumulations and by having their closets or cess pools cleaned and put in a sanitary condition by Saturday.

May 12th, 1928. After this date an inspection will be made and prosecutions may follow if this order is disregarded.

The Board asks for the kindly co-operation of the citizens in this effort to maintain sanitary conditions and appearances better.

By Order  
Local Board of Health.

## Spring Cleaning Season IS HERE

Why bother baking cakes?  
Fresh Cakes at the Bakery every day  
Pies made to order.  
Honey Buns Saturday.

## The Farmyard Hen Produced In Canada Last Year Over 253 Million Dozen Of Eggs

Some one has figured that if the eggs laid in Canada in 1927 were placed end to end they would girdle the universe four and a half times. It certainly staggers the imagination to comprehend over three million eggs or 15,000 million of them. And these are the farm eggs only. Dear knows how many more thousands of fowls should be added for the eggs laid in poultry houses in the cities and suburban areas in Canada, but the number must be considerable. All of them, whether from farm or city, disappear down the national gullet at the rate of 6,000 per minute. The rate is still more faster at meal times, for these figures are on a 24-hour basis. Still there are not enough to satisfy the national appetite and some eggs have to be imported into Canada.

Canadians are the greatest egg-eaters on the face of the globe and consumption has been increasing tremendously, especially since egg-grading regulations came into force. It is estimated that the average Canadian consumes something like 337 eggs per capita per annum. Production of farm eggs in 1927 equalled 320 eggs per capita. While production is increasing rapidly, principally through the breeding of better hens rather than increasing the flock, consumption is increasing at a still more rapid rate as indicated by the excess of imports over exports of eggs.

Canada imported at a total of 31 million dozen eggs in 1927, and exported less than half a million dozen. Excess of imports over exports rose by a million dozen over the previous year. There are figures on eggs in the shell. Eggs other than in the shell, i.e., as they are eaten, are not statistics, are also imported into Canada in some volume, especially in recent years. Most of the eggs in the shell come from China and the total amount imported in 1927 amounted to slightly over 2 million pounds, compared with 1.5 million pounds in the previous year.

The unfavorable trade balance resulting from excess of imports over exports of eggs amounted to \$1,700,000 in 1927. This is an increase over 1926 of upwards of a million dollars. Considered by these figures may appear large but they fade away by comparison with farm egg production in 1927 of over 253 million dozen valued over \$80,000,000. The long and short of it is that Canada just barely failed to meet her egg requirements last year by about 3½ in-the-shell eggs per capita to which must be added the importations of produced eggs amounting to perhaps two eggs per capita. Domestic egg production failed to meet the national appetite therefore by roughly 2½ eggs per capita—a trifling amount it is true, but the shortage is increasing.

What is the outlook? Can Canada meet her own egg requirements in the future? Can she regain her lost export trade in eggs? In regard to the first of these questions, farm egg production is increasing very rapidly, in fact there has been a gain of fifty per cent since 1921. In the same time the number of hens etc. on Canadian farms has increased by only 35 per cent, showing that the production per hen has increased considerably since 1921, due to the rearing of better birds for egg-production. The process of weeding out undesirable birds and substituting hens of proven high production strain appears to have borne excellent results in the past year, an increase of 6.8 per cent in production being recorded for 1927 over 1926, while the number of hens etc. in farm flocks increased by only one-fifth of one per cent. Even though increasing the farm flocks the industrial flocks of 1927 just about kept pace with increasing population and the increasing appetite of Canadians for eggs. There is still room for very great improvement in the farm flocks from the egg-production standpoint, but the process cannot go on indefinitely and the farm flocks must eventually be increased to meet the requirements of the supplies of eggs if consumption per capita goes on climbing.

If Canada had the eggs, she could no doubt find a market for them in Great Britain, says the Department of the Interior, through its Natural Resources Intelligence Service. In fact the market for Canadian eggs has always been there, but since 1922 the exportable surplus has never amounted to much. The United Kingdom the magnitude of the market is the United Kingdom and what could be done with poultry in Canada if prices were attractive. The United Kingdom spent over \$90,000,000 a year in im-

### INTELLECTUAL BRITAIN

#### The Influence Of Environment In Racial Development

John Bull takes his place among the highbrows. Professor D. G. Parsons, English anatomist, says that for the past hundred years the skulls of his fellow-countrymen have been increasing in length and height. He adds that "this is a change which can be attributed only to environment, since it is repeating no known ancestral pattern." The discovery is regarded as of sufficient importance to be laid before the Royal Anthropological Society. In such impressive fashion are we given to understand that the highbrows of today are the descendants of the lowbrows of yesterday. And we are told further that "the discovery of this growth upward is a strong argument for the influence of environment in racial development and underlines fully in craniology as a guide to racial relationships."

Information is not at hand as to how Professor Parsons reached his conclusions. Was it a case of actually measuring the skulls of the departed, thus giving the lie to the contention that dead men tell no tales? Did the anatomist carry science to the portrait gallery? Or was the latter's gullible mind supply figures for use in the comparison? It is conceivable that the size of grandfathers' ears might give the lie to the underestimation of craniology as a means of determining racial relationships.

But however the result was obtained, there is reason for rejoicing because of it. It is gratifying, everywhere but in Chicago, to be told that the English are not highbrows. But the information is, of course, to be understood as applying to the general. There were highbrows in Merry England in the brave days of old. No communication to the Royal Anthropological Society will come from Francis Bacon, John Milton and Shakespeare to be numbered among the lowbrows.—Boston Transcript.

### Manitoba Mine Is Gold Producer

The Central Manitoba Mines have shipped 3 gold bricks since the mill began running a few weeks ago. Development work continues and ore reserves now in sight are sufficient to supply demand for gold for three years. The ore is improving in quality with depth. T. C. Anderson, vice-president, states. Exploration with diamond drills in progress on sections of the property that have not yet been opened up.

### Speed Of Radio

If a bullet from a modern high powered rifle did not lose its velocity it could travel around the world in a little over 15 hours; while the impulse from radio-sending station would cover the same distance in less than one seventh of a second.

Thermometers sent up in experimental balloons have noted a slight rise in temperature beyond the altitude of 9½ miles.

### IS VAST ORGANIZATION

#### Ukheep Of London Hospital Costs Million and a Quarter Dollars Yearly

"The Prince of Beggars" has made what he thinks may be his final appeal for the past 30 years he has begged from the public many millions of dollars, and he is still asking for more. Surely, therefore, he deserves the title which the newspapers have bestowed upon him. "Deserved" is the right word, for he has begged wholeheartedly in a good cause—the cause of suffering humanity.

Viscount Knutsford is chairman of the London Hospital, the largest hospital in this country, which needs an income of over a million and a quarter dollars yearly for its upkeep. It was founded in 1740 with a subscribed fund of 100 guineas, and soon afterward the secretary had the unpleasant duty of informing its committee that they had just one shilling left in the bank.

But the hospital survived the crisis, and in the course of the ensuing 150 years has developed, after many trials and tribulations, into the present vast organization.

The London Hospital has eighteen operating theatres, fourteen special departments, a laundry that washes 3,000,000 pieces a year, four convalescent homes and surgical annexes, a nurses' training school, a medical night school, the university of London complete as a money and brain can provide.

Such a huge institution, run on the voluntary system, with its doors thrown open generously to every sufferer from every disease, needs a huge income; and it is due mainly to the munificent provisions of "the Prince of Beggars" that it has been able to carry on its great work.

### Becomes Paying Industry

#### Texas Oil Workers Make Money Selling Hatfield's Shoes

Dime Fashion has interfered with a mainline of workers in the oil fields of West Texas.

Men who work about the derricks once delighted in toasting sticks of dynamite or small cans of nitroglycerine into dens of rattlesnakes. But fashion decrees make shoes and give the reptiles a commercial value. So the workmen, who have been more prosperous because of the slump in the oil industry, now drag the snakes from the derricks with hooked poles and collect the skins, which are dried in the sun and shipped to shoe manufacturing centres where they bring price which will augment the wages of the laborers.

Several hundred rattlesnakes have been found in a single den.

### Right At That

To test their knowledge of English the native students in a Chinese Christian college were asked to give in their own language the meaning of certain English words. "Out of sight, out of mind." One of them summed up the situation in two words—"Invisible, insane."

## C. P. R. Adds Further Trackage

Photo shows the huge area covered by the railway tracks of the Canadian Pacific Railway around the harbour of Vancouver.

Over one hundred miles of track, plus trackage facilities exclusive of main and subsidiary lines running through the yards for the passage of through and local trains, serving Vancouver and her sister ports.

On the north shore to the south end of the annual Narrows Bridge, the C.P.R. has more than 9 miles of trackage. From the south end of the second Narrows Bridge to Coal Harbour, the C.P.R. has 27 miles of trackage. From the south end of the second Narrows Bridge, the C.P.R. has 27 miles of trackage. From the south end of the second Narrows Bridge, the C.P.R. has 27 miles of trackage.

Mr. C. A. Cottrell, C.P.R. General Superintendent, says: "The figures demonstrating the vast extent of ex-

Another four miles of yard rails lie west of the Fraser River Bridge. This trackage, so far as the C.P.R. is concerned, is not only taking care of a steady and normal growth in trade through the great port, but also handling an abnormal expansion in westward grain movement.

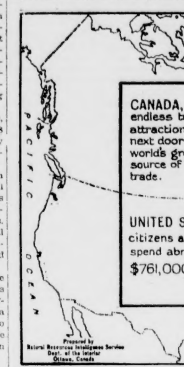

Additional have been made and others will be necessary to care for the growing trade in the port. The Canadian Pacific's first westward wheat shipments were made in 1921, and the Regina Industrial and Agricultural Association have endorsed the project, and the federal government will now be upon the verge of getting its approval and support.

## Canada's Matchless Advantage In Relation To The Growing Tourist Trade From U. S.

If the volume of United States tourist travel continues to grow at anything like its recent rate, it will be only a matter of two or three years until the amount of money expended by Americans abroad reaches the colossal sum of a thousand million dollars a year. For 1928, according to the United States Department

of Commerce, the outlay of American tourists outside \$750,000,000 or nearly twice as much as the Dominion Government collects in tax revenues in an ordinary year. Already our tourist business represents a big item, the expenditure of tourists in the Dominion amounting

to roughly \$250,000,000 a year. And there is ample reason to believe that this total can be doubled in the next ten years. Canada possesses a less variety of attractions for holiday seekers of all kinds, plus a 4,000-mile frontier facing the United States, which constitutes the world's wealthiest and largest source of tourist travel. Tak-

UNITED STATES citizens annually spend abroad—\$761,000,000

on all in all, there is probably no other country so favorably situated for attracting tourist trade. The warm welcome which Canadians extend to visitors is an ever-ready incentive in drawing them toward the Dominion. Those who come gladly return again and bring their friends with them—Charles Stewart, Minister of the Interior.

### Banishing Sweet Corn

#### New Variety That Matures In Less Than Seventy Days

The new Banishing corn originated by the Division of Horticulture of the Experimental Farms System, is growing so valuable in the Prairie Provinces that steps are being taken to produce large supplies of seed. This variety of sweet corn, practically equal to Golden Bantam, becomes ready for use in less than seventy days, which makes it adaptable for general use in the home and market gardens of older parts of the Dominion. A considerable quantity of seed of the Banishing corn was produced at the Morden, Manitoba, Experimental Station last year. This year the stock is to be multiplied at some of the other Western Experimental Stations.

### Garden Roses

#### Five Hundred Varieties Have Been Tested Out In Canada

Roses have been under test at the Central Experimental Farm for forty years, and observations on the relative hardiness, attractiveness, blooming season, freedom from disease, and general merits of different varieties have been made and recorded. Some 500 varieties are now being grown in the flower gardens of the farm. The results of these years of investigation are given in a bulletin entitled "Hardy Roses" which is distributed by the Publications Branch of the Department of Agriculture at Ottawa. An interesting list of roses recommended for small gardens is in the list are three Hybrid Perpetuals, one of the outstanding merits of Frau Karl Druschki, is acknowledged to be the finest white rose in cultivation. It is a strong, healthy variety with an abundance of bloom throughout most of the season. Another very popular hybrid perpetual is Mrs. John Laing, a rose pink, fragrant variety which does well in town gardens. The third variety is the Hugh Dickson, a very attractive crimson shaded scarlet flower, vigorous, and a free bloomer.

Hybrid Tea Roses recommended are Caroline Testout, a reliable, bright warm pink variety, Grass and Teplitz, a very fragrant and hardy crimson rose, and La Touche, a pale pink. Perpetua roses recommended are: Mme. Edouard Herlot, a free vigorous bloomer with a wonderful combination of coloring. Souvenir de Claudius Pernet, a beautiful yellow flower, and Willows, a hardy, continuous bloomer of unusual color.

### L.C. Lumber Production

Lumber production in British Columbia in 1927 totalled 740,230,000 feet board measure, an increase of 27,000,000 feet over 1926. The principal export markets for British Columbia lumber and forest products were the United States and Japan. The value of the lumber production in 1927 was \$10,000,000 more than in 1926, and the value of the forest products was \$5,075,000.

### World's Grain Show

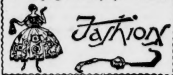

Producers of the proposed World's grain show to be held at Regina, Saskatchewan, in 1932, are forwarding their plans as rapidly as possible. The show will be held at the Regina Industrial and Agricultural Association have endorsed the project, and the federal government will now be upon the verge of getting its approval and support.

### Good Food For Prince Rupert

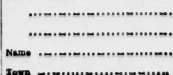

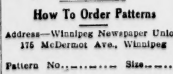

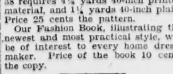

#### Will Soon Become Important As A Grain Shipping Point

In a speech delivered at a banquet of Prince Rupert pioneers, Mr. McMorris, mayor of the city, regretted that he could not divulge the result of the recent visit to Ottawa until he had submitted a formal report to the Council, but he assured the gathering that the pioneers had made no mistake in establishing themselves in Prince Rupert. He predicted that within two years at least twenty million bushels of grain would be shipped overseas through Prince Rupert, and within the next ten years, all would be amply recompensed for their unwavering faith in the future of the city.

Correct answers given next week. See how many you can answer by that time.

## ANSWERS TO LAST WEEK'S QUESTIONS

455. The Sky-Scraper Population of New York?

Greater New York has 165 buildings 15 to 60 stories, ranging 149 to 792 feet in height. Between City Hall and Battery Church and Pearl streets (100 x 6 blocks) skyscraper floor space is 25 to 50 times the ground area—averages a million people to the square mile. A dozen sky-scraper around City Hall Park house more people than city's entire population 100 years ago. 19 buildings on and near Broadway have business population, not counting visitors, of 90,000. Greater New York has about 15,000 elevators, mostly in the downtown sky-scraper section, can empty buildings in an emergency in 20 minutes; carry two billion passengers annually.

457. How They Map the Earth by Aerial Photography?

The pilot guides his plane back and forth along imaginary parallel strips until the entire area being surveyed is photographed. To insure all the picture being on the same scale, he keeps the plane at a uniform height. As the plane speeds along the photographer adjusts the camera to compensate for any deviation of the plane from its course, and times the consecutive exposures, in accordance with the speed of the plane, so there will always be considerable overlap of the pictures in all directions; this insures each successive picture being fitted to its predecessor when the photographs are all fitted together to form the completed map.

458. Principal Applications of Aerial Photography?

Aerial photographers have aided in planning great industrial plants, laid down right-of-ways for power lines, mapped drainage districts, charted fire hazards; solved the tangles of railroad terminals; by mapping entire cities from the air have revealed at a glance the solution of traffic problems and city planning; as timber cruisers have surveyed and mapped thousands of square miles of forest lands, not only charting location and varieties of timber, but making possible an actual count of the individual trees; have penetrated many remote and unexplored regions, bringing to light vast resources in power and wealth.

459. Some Outstanding Examples of City Aerial Mapping

Usually done from altitudes of 2,500 to 10,000 feet. The huge automatic camera points downward through the fuselage, and no detail can escape its searching eye. Mapping Greater New York from the sky required 3,000 flights and embraced territory of 625 square miles. 2,000 exposures were required to include the city's five boroughs; and when matched together to form a map, true to scale, the photographs portrayed in minute detail every building, thoroughfare, nook and corner of the great metropolis. The developed pieces of a recent aerial survey of a New England town revealed nearly 2,000

buildings not on the tax lists—that had gone tax free.

460. How Alaska Was Mapped From the Air?

In 1926 U. S. Navy flyers mapped the unexplored fastnesses of Alaska, completing in 3 months a survey that by road and transit would require 10 years of struggle through an all but impassable wilderness. At height of 2 miles skimming over snow-capped peaks, deep wooded valleys. With ingenious 3-lens cameras making 3 exposures simultaneously and flying at 100 miles per hour were able to map in an hour a strip 7 mile wide, 100 miles long, or 700 square miles. Averaged a survey of 1,000 square miles a day; in 385 flying hours traveled 35,000 miles. Discovered hundreds of new lakes and rivers, some of them sources of immense power; and millions of acres of priceless timber.

461. The World's Potential Water Power?

Approximately 453 million h.p., based on ordinary low-water stage; installed capacity is usually 2 to 3 times the power available at low water. Expressed in million horse power: North America 66-U. S. 35, Canada 18½, Mexico 6; South America 54—Brazil 25, Argentina 5, Peru 4½, Colombia 4; Europe 37—Great Britain 9½, Sweden 8, France 5½, Caucasus 5, Spain 4; Asia 69—India 27, China 20, Siberia 8, Japan 4½, French Indo-China 4; Africa 190—Belgian Congo, Belgian Mandate 90, French Congo 15, French Mandate in Cameroons 13, Nigeria and British Mandate in Cameroons 9, Madagascar 5, Liberia 4; Oceania 17—Borneo, N. Guinea, Papuan 7½, New Zealand 2½.

462. How the Farmer Spends His Money?

U. S. Department of Agriculture has made a survey of 2,886 families in selected localities in 10 states—3 in New England, 3 in South, 4 in Central U. S.; various types of farms, with average size of 147.5 acres. Average value of goods, both furnished by farm and purchased, \$1,597.50 per family of 4.4 persons—food \$658.80, rent \$109.60, clothing \$234.00, "operating goods" (fuel, hired help, auto, telephone, etc.) \$213.10, "advancement goods" (education, reading matter, organization dues, church, Sunday school and missions, welfare organizations, recreation) \$104.80; health, personal belongings, insurance and furnishings \$86.30.

## 5,000 FACTS ABOUT CANADA

Frank Yeigh's popular compilation, "5,000 Facts About Canada," for 1928, is out, having reached its twenty-fifth year. The edition is marked by many improvements, including an illustrated section and tables showing the marked progress of the Dominion in a quarter of a century, while the stirring story of our national development in a single year is strikingly shown in a series of crisp paragraphs in 50 chapters, ranging alphabetically from "Agriculture" to "Western Canada." No publication sells Canada—not only to Canadians but to the world—more effectively than this tabloid encyclopedia, and one can well understand that it has a large circulation. It may be had from leading newsdealers or by sending 35 cents for a copy to the Canadian Facts Pub. Co., 588 Huron St., Toronto.

A pail of water costs nothing in Canada as a rule but the trouble of drying it up. Put out your camp fire and help save Canada's diminishing forests. Twelve million dollars worth of timber is being burnt up every year simply for lack of a few pails of water at the proper time.

In the Medicine Hat by-election on Tuesday Hector Lang, Liberal, was elected to the legislature by a majority of 498 over Hendricks, Conservative. With four candidates up, it took the third count to give Lang the clear majority required under the preferential ballot.

Carelessness in the woods has caused Canada to unfold millions of acres of forest, which have destroyed 60 per cent of the original forest.

**FOR SALE**  
Early Ohio seed potatoes. Good sound seed. Call afternoon only. R. G. Bisset.

A cigar butt is not out when you throw it away unless you know it is out. That's the safe rule to go by. Millions and millions of acres of good pine forest would be available for better logs than are generally available today, if smokers had always practiced that safe rule.

## CHURCHES

## UNITED CHURCH

Services: 11 a.m. and 7:30 p.m.  
Junior congregation at the 11 o'clock service.  
12:15—Sunday School.  
Rev. R. W. Dalgleish.

## ST. JOHN'S THE EVANGELIST CHURCH OF ENGLAND

Services will be held on Sunday as follows:  
12 o'clock—Sunday School and Bible class.  
7:30 p.m.—Evening service.  
Subject: "The True Odd Fellow." Preacher, Rev. W. Barlow, L.Th.

On Sunday evening the Odd Fellows will hold their annual church parade, at the above church. We give a hearty invitation for all to come and worship with us. A special Odd Fellows' service will be held.

## THE CHURCH OF THE NAZARENE

11:30 and 7:30.—Preaching  
10:30—Sabbath School.  
Tuesday, 8 p.m.—Prayer meeting.  
Friday, 8 p.m.—Bible study.

You are invited to worship with us.  
"Don't stay away because of the children; the boy and girl who eat at your table should sit next to you in church."  
Rev. A. H. Eggleston, Pastor.

## LUTHERAN CHURCH

Sunday, May 6th.  
English service at 11 a.m.  
Norwegian service at 3:15.  
Sunday school at 12:15.  
The confirmation class will meet at the Lutheran Manse Saturday at 3 p.m.  
All are cordially invited.

R. Hermansen, Pastor.  
Telephone 21.

## Saskatoon Winter Fair Successful

Exhibits From Western Canada and Ontario Completed

Premier Honored  
"The biggest and best fair yet held," aptly describes the recent Saskatchewan winter fair held at Saskatoon March 20-23. Accommodation for the livestock classes proved entirely inadequate to the needs of the extended lists of entries in the horse and cattle departments, and four additional barns in the city had to be requisitioned to house the surplus stock. Exhibits from the three Western provinces and Ontario, together with recent importations from Great Britain and Europe competed for premier honors in many of the events and the judges were faced by some very strong classes in both horses and cattle sections. F. Wright, Dr. H. B. Bask, placed the awards in the cattle classes, Dr. Reid, of Canora, Sask., judged the Percherons, and Belgians, and Albert Noy, of New York, Quebec, officiated in the Clydesdale section.

Ben Finlayson, of Brandon, Man., and C. M. Bear, of Kippen, Ont., were prominent winners in the stallion classes, the former with his imported Clydesdales, and the latter with Percherons and Belgians. Female classes were chiefly represented by entries from Larimer of Compuet, Pelconer, of Guelph, and Cruise, of Saskatoon. Leslie and Davidson, Watrous, Morris and Robertson, Zesland, and Murray and Patterson from Young, were prominent winners in the Clydesdale commercial section.

The grand champion steer of the show was found in Victor Gleason, owned by John Brown, of Brandon, Man. Earl Brown, also of Brandon, secured first place in the boys' and girls' calf class with Nigger Boy. Both these calves were of Angus breed. A Shorthorn Angus steer, which occasioned considerable interest was "Wee Willie," exhibited by the University of Saskatchewan. This steer, while weighing about 2,000 pounds at 2 years and 8 months of age, was still good enough to win the Saskatchewan beef class.

Concluding the fair with the most useful sale of fat stock at which the top calf offered by Earl Brown brought 58 cents per pound, the fair was a success. It expressed their satisfaction at the splendid progress that has attended this annual show, to the chief manager, Mr. Sid. W. Johnson, and to the President, Mr. A. Wilson, the increasing support of exhibitors generally, is particularly gratifying. New accommodation will have to be secured before another year as the present show building—an old Canadian National restaurant—is to be sold and removed from the premises. A permanent arena is the objective of the management and judging by the magnitude and the success of the fair just held, nothing short of this will adequately serve the need of Northern Saskatchewan's annual winter fair.

### Sheep For Manitoba

Plan To Place 100,000 Sheep Annually On Manitoba Farms

A movement is under way for the placing of 100,000 sheep annually on Manitoba farms. These will be sold in groups of fifty to each farmer, somewhat similar to the plan now in operation in North Dakota. At a conference of members of the Sheep Breeder's Association financial representatives and members of the Winnipeg and Brandon offices of trade, J. D. McGregor was appointed temporary chairman of a committee to make further arrangements for the carrying out of the plan.

Mrs. Floop: "Don't take it to hand. In a month hell be here again. I thought the judge would make it ails month."

Artisocrats and dentists are judged by the excellence of their extraction-

"Speaking to my wife I used a word which so offended her that she has not spoken to me since. I told her I should be obliged if you would tell me what the word was."—Male, Paris.

W. N. N. 1723

## Used Wrong Metaphor

Lloyd George Credited With Making Slip That Turned the Tables

And speaking of the use of words, Mr. Lloyd George's undoubted fluency has just been turned against him in an ingenious manner. There was a by-election in the north the other day. "L.L.G." intervened in the campaign, and the Liberal candidate won. The Liberal candidate forthwith declared that the Tory party was "like a polar bear drifting south on an iceberg." And, pleased with his caustic metaphor, he went on to declare that the defeated Conservative candidate had been "smothered."

Whereupon the defeated Conservative produced a dictionary in support of his contention that he who is smothered is "the victim of a very mean outrage."—London Correspondent, New York Herald.

## Name Hotel After Famous Wheat

Hotel Marquis To Be Erected In Lethbridge As a Community Enterprise

The new hotel which is being built in Lethbridge as a community enterprise, is to be known as the Hotel Marquis, to commemorate the famous spring wheat of that name. Marquis wheat was originated at the Canadian Government Central Experimental Farm, Ottawa, about twenty years ago. Its introduction is regarded as the most important event in Canadian agriculture. About 50 per cent of the spring wheat grown in Canada and 60 per cent grown in the United States is of the Marquis variety. Marquis wheat has won more world championships at the International Grain and Hay Show at Chicago than any other variety.

## Canadian Tree Species

In Canada there are approximately 150 different species and varieties of plants reaching tree size. Only 31 of these are coniferous, but the wood of these forms 95 per cent of our forest products, and the trees themselves cover even a larger proportion of our potential forest area.

"Is this the road to Beaville?" enquired the tourist.

"Yass," drawled the farmer, "if that's your intention to circle the globe that if you turn around it's 25,000 miles nearer."

Madagascar's surplus crocodiles are to be skinned for bookbinding and shoe leather. Their fat is to be used in the treatment of rheumatism and other diseases.

## Red Fife Wheat

Was the Standard Spring Wheat Variety in Western Canada For Years

The first notable variety of wheat to be introduced into Western Canada was one which had been developed more or less fortuitously, by a farmer named David Fife, of Peterborough County, Ontario, after whom the wheat came to be named. This variety, fortunately, for Canada, proved to be a wheat of very high milling and baking quality as well as a good yielder. From the year of its introduction into Western Canada (about 1882) until the appearance of the world-famous Marquis, Red Fife was the leading, and, in fact, the standard spring wheat variety of Western as well as Eastern Canada. It was this variety which came to be taken as the basis upon which Canadian official and commercial grades of wheat were established. Thus the original grades required that, in each case, there must be a certain minimum per cent of Red Fife present. It is of further interest to note that practically all the leading spring wheat varieties in Canada today are more or less closely related to Red Fife.

While the introduction of the Red Fife variety into Western Canada constituted an epoch-making event, yet this variety possessed certain serious defects. The defects of Red Fife, specially its tardiness in maturing, were quickly recognized by Dr. William Saunders, who became the first Director of the Canadian Government Experimental Farm System. He realized that if those great winter plains of the Canadian West, just then opening up to extensive exploitation, were ever to attain a position of prominence as a wheat producing country, an even more mature variety than Red Fife must be employed.

## What Interested Him

Hubby didn't show much interest in the new arrival. "What's that?" the young wife was disturbed. She was overjoyed one night to discover him standing over the baby's cot.

"A penny for your thoughts," she said, tenderly.

Started, he blurted out: "For the life of me I can't see how anybody can make a cat like that for \$1.50."

Col. Lushbridge is like to long for a double to do his talking for him. This is the first hint that the famous young man is contemplating matrimony.

## Television In the Home

Should Be Possible Within a Year In Prediction

The New York Times quotes an unnamed representative of the Radio Corporation of America as predicting that one year ought to see television in the home. The invention of television, the newspaper says, causes observers to the radio to give credence to the visions of the acquisition of the Victor Talking Machine Company by the Radio Corporation. The observer and radio engineers say that television and picture radio require a motor to revolve a disc or cylinder synchronized with similar apparatus in the transmitting end and that it is logical that the phonograph and radio should be one complete instrument.

## Methodical As To Tips

New York Waiters Know What To Expect From Regular Customers

New Yorkers become accustomed to leaving the same amount of money as tips when they dine in hotel restaurants. For luncheon some leave a quarter, and for dinner they give a half-dollar. Waiters know just what to expect when they see various parties enter the dining rooms and take their favorite tables.

After eleven years' study, Dr. Volney S. Cheney, medical director of a large Chicago packing firm, declares that colds are not infectious at all, but are caused by overeating, lack of exercise, loss of sleep and mental strain.

## Lead Mining In Yukon

In 1926 the Yukon produced about 2,500 tons of lead or about 2 per cent of the total Canadian production. Shipment takes the form of silver-lead ores and concentrates from the Mayo district.

George: "Yes, he was bitten by his own dog."

William: "Was 'e now? How was that?"

George: "He forgot himself and spoke to the dog like what he do to his wife."

## IS WEIGHT LESS AFTER SLEEP?

Experiment Made By Lawyer Is Not Conclusive Proof

A certain observer says man loses weight while he sleeps. The proposition that the body loses weight during sleep is not in accordance with the views of stock men. In the house of falling logs, try to have them sleep about two-thirds of the time. Chicken fatteners keep their stock in darkened rooms. They plan to have them sleep all the time except for short feeding periods. Experience seems to teach that animals tend to put on weight without sleeping. Then let us see what is the evidence to the contrary.

A lawyer will considerable training as an engineer sent a very careful detailed record of himself for several years, or rather, during the course of several years he kept such records for several periods of several months each. He was equipped with accurate scales. He weighed himself many times during a day and entered his weights in the record. He made detailed records of everything he did and ate, and of importance in his environment. All of this record was plotted on charts. One weighing was just before going to sleep and another was taken waking without exception he weighed less after sleeping than he did when he went to bed.

While sleeping nothing went into his body except comparatively dry air. Nothing left his body except expired air and sweat. Some body activity was used up in maintaining body temperature and in carrying out normal least action and other vital processes.

Had this man weighed and analyzed his food he expired, and he had had he determined how much moisture it contained, and had he collected and weighed the perspiration he would have found that he counted for all his loss of weight during the sleeping period. In all probability he slept in air that was too dry. His body, through breathing, had the job of moistening the air of his room. Carrying out that job was responsible for the loss of weight.

## Stating a Strawberry Plantation

Strawberries Will Thrive On A Great Variety Of Soils

Strawberry plants will not stand being covered with water in early spring or during the late winter. Therefore good surface drainage is absolutely necessary. A gentle slope is the best place on which to plant. The strawberry will thrive on a great variety of soils, from a very light sand to heavy clay, but, according to a Dominion Department of Agriculture bulletin on the "Cultivation of the Strawberry," it is best to select a moderately light, friable soil. A soil that does not pack or bake is to be preferred. It is important to get young runner-plants rooted as early as possible. Land under cultivation should be freed for a new strawberry plantation, as land which has been in soil for some time is liable to be infested with white grub. Land infested with such grubs or other persistent weeds should be avoided. A thorough ploughing, disking, harrowing and rolling is necessary before planting. The bulletin, which covers the whole subject of strawberry growing, may be obtained from the Publication Branch, Department of Agriculture, Ottawa.

## Good Memory Test

We were struck the other day by reading that the President of the Firemen's Federation of France was at a dinner in Paris the other day and offered to give a second dinner to the whole company if even three of the guests could tell him the position of the fire alarm nearest his home. It was found that not one of them could. How does that apply to our readers? Do you know where the nearest fire alarm is? Also do you know the number to phone in case of a fire? Try it on yourself and then on your friends.

## Her Instructions

A young woman who seemed to be having her first experience in a bank approached the window of a paying teller and gave him a large check which she wanted to cash.

"How you wish the money?" the teller inquired.

"Oh," replied the young woman, "in confusion. I'll just hold it in my hand and you can put the money in it."

The silverware and the luncheon are the only domesticated insects in the world.

## Honor "Mounties" "Homicides"

Names Being Given To Stations On Hudson's Bay Railway

A prophet may be without honor in his own country, but it is different with the hero.

The foundations of Canada's North and West were laid with heroism and Canada does not forget her pioneers. The mounted policeman has always been a figure of romance in Canadian history, and it was a typically Canadian gesture that, when it came to the naming of stations along the Hudson's Bay Railway, two "mounties" were named.

The point which has hitherto been known as mile 174.96 will be known in future as Hoskin, and, further along the line is a place called Wilde. Corporal C. H. Hoskin was killed in 1897 by the Indians. Almight Voice, and Sergeant W. B. Wilde was killed by an Indian, Charcoal, the year previous. Both men died at their post, trying to maintain the law, and in honoring them Canada honors itself.

In revision of station names along the Hudson's Bay Railway, a number of other men whose lives have not been so spectacular but who have worked in their way for the opening of the new country are commemorated. Hawbitt is named after Ralph Webb Hawbitt, a pioneer settler, and there is a point bearing the name of General Paterson president of the On-to-the-Bay Association, both of whom have been successful in their efforts to bring the North to its own. Station names for J. A. Campbell, former M.P. for The Pas, and J. A. Campbell are named after the present member of the House of Commons.

The recent visit of Right Hon. L. C. M. St. Amery, secretary of state for the Dominions, is commemorated at Mile 256, which becomes Amery.

## Theatre For Passion Play

New Building In Bavaria Will Be Ready For Next Performance

A theatre built of stone and with a seating capacity of 4,500 will soon displace the present wooden structure which has been used for the performance of the Passion Play. Whether the next series of performances will be held in 1930 or 1932 is not definitely settled, but the new structure will be opened whenever they are held.

## Agriculture Holds Leading Place In Trade Of The Dominion

The importance of Canada as an agricultural country is emphasized in the trade report for 1927, in which the value of agricultural products and animal products are credited with \$1,514,469. Next comes wood and paper valued at \$284,745,000. Among the principal items of imports agricultural, vegetable and animal products total \$227,515,394 in value, with iron and its products in second place, valued at \$249,145,385. Canada's foreign trade is done with 29 countries.

## Trunk Of The Dominion

At the ship's concert on an ocean liner a collection was taken up for the Seaman's Fund. It totalled \$460.03, and the chairman, amused at the three old crows, suggested that perhaps there was a Scotchman on board. "Hoot hoot," piped up a voice from the Highlands, "there are three of us!"

## Trunk Of The Dominion

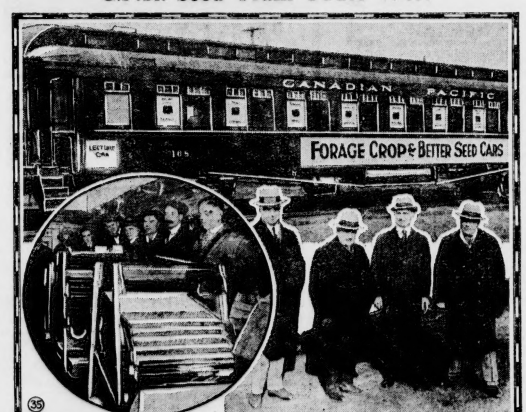

A woman may pretend to be convinced against her will, but she never is.

There'll be no one in heaven better than the average machine he is.

"AN infatigable and a fraileless man was acquired. Who ought to be contented with it."

"The jury" — Il Travaso, Rome.

## C.P.R. Seed Train Tours West

Upper-Saskatchewan field trials and seedling nurseries, showing various types of seedling nurseries, including the Pullman, the dining car, and the seedling nurseries. The train is shown in a landscape with fields and trees.

With a view to further promoting the best use of seeds and obtaining first-class results in addition to educating the farmers as to how to overcome seed and forage crop difficulties, the Canadian Pacific Railway has again placed a touring demonstration train on their lines, which visits all important farming centres in the West, Prairie Provinces and part of the East.

This train went into service at the latter end of last month, the opening being attended by a representative gathering of government officials and members of the Saskatchewan Wheat Producers. The value of such a train was stressed by the Hon. C. M. Han-

lton, Saskatchewan Minister of Agriculture, who urged the farmers to make the best possible use of this splendid advantage offered by the railway. In addition to the lecture cars, the train consists of two baggage cars carrying a number of seed cleaning machines and others to be used in demonstrating seed and soil treatment. Entries will also be featured throughout the tour, lectures in this connection being given by J. B. Logan, government official promoter.

In the towns already visited, the train has been greeted with enthusiasm by the farmers displaying an eagerness which speaks highly of the reputation of the seed and forage crop demonstration train. It is oper-

ated in conjunction with the University and extension service of the Saskatchewan provincial government, with all cars having been equipped at the Weston Shops of the Canadian Pacific Railway at Winnipeg. Several of the cars are provided with motor-driven grain cleaning machinery of various types, while other cars are fitted with motion picture accessories for the showing of various phases of grain activities, with still others for the purpose of exhibiting grain and granaries.

The entire train is opened for the inspection at the various stops, demonstrating to the farmers the importance of seed selection.

Illustration of a man in a suit, possibly a politician or official, standing and speaking.

**LESSON No. 16**  
**Question:** Why do growing children, particularly girls, need emulsified cod-liver oil?

**Answer:** Growing children, and particularly girls, need vitamin-rich nourishment to help them through critical stages of extreme tax on their strength.

**CHAPTER XXII—Continued**

This appeared to Danny Corbett went over to the couch and carefully inspected the young thing that was likely to make inroads in his hard-earned income. He put his chapped and dirty little hand very lightly on the glossy, smooth hair, and felt it as tiny beads. He gently touched the velvet cheek and found it soft as a rosebud to his fingers. He put his hand in his pocket and drew out thirty cents in change and looked hard at it. He may have been thinking of cold winds and acting like he knew something of them. But his answer was, "Stare Mike! I'll do it. Are you sure your mother will let it, Ma?"

Danny's tone was eager.

"We ain't wishin' her mother no harm, Ma," Rose quickly interposed, seeing the relief that was coming to her husband's partner. "We ain't wishin' nobody no harm." Rose was very anxious not to produce the mother-in-law effect. "We ain't wishin' nobody no harm," Rose was very anxious not to produce the mother-in-law effect.

The warm heart of Maggie Corbett was tender to her offspring at that moment. "Look at that, John, would you?" Good little things, after all, and yet it was only this morning they were fightin' like drunken champions. I often thought if they had a baby in the house it might have set them free. Well, don't be settin' your hearts on this one, or for the mother is not gone, there is always a thing; though you never can tell about a woman when her man has come back on her.

Outside the snow was still falling. The evergreen trees were bending with the weight of it, their branches drooping down like weary warriors. Christmas Eve surged forward with all its infectious gladness to the crowds of isolated shoppers in the streets. The electric tins in the windows were hard pressed to keep back the shooting frost ferns, which threatened to hide the season's offerings. Handcuffs, mittens, with beautiful ribbons thrown over the backs of the seats, stopped at the curb to let out burrying shoppers; delivery boys on foot, on wheels, in wagons, loaded with parcels, hurried to the suburbs of the city, sometimes pausing to look in at unartificial windows where happy families gathered around sparkling tables—families so happy over the arrival of guests that they forgot to draw the blinds, and so allowed some of their happiness to overflow into the street. They shaded lamps, threw patches of radiance on the gleaming snow. Christmas wreaths tilted with satin streamers glowed deeply red against the windows. The pulse of the city was beating with laughter and sleighbells.

At the corner of Second Street and Jasper Avenue a congested street stopped to let out a cock of little girls and boys on their way to the Christmas trees in the First Baptist Church. Certain of the little girls, with their curls protected from the falling snow by tuckled safety hats under their tags, were carrying mysterious pasteboard boxes containing cashes and bows and wings of the fairies. They were their identity hooded and masked, their clarity and sex entirely unguessed, for were they not cast for the dramatical wishes of Shadford?

Accompanying them was a liberal sprinkling of parents, mostly mothers, with their hands on their hips, who had the appearance of having been dragged out. The mothers had an air of very conscious unconcern. They were not aware that their little boys or girls were going to take a part that was bound to be the very best of the program.

The Salvation Army Citadel blazed with light and pulsed with activity for the big supper, where all were welcome, was going on, and the storm of turkey and sage and onions, drifting out into the street, compelled the reluctant to go in.

At midnight, when the bells were ringing, the snow suddenly stopped in that abrupt Alberta way. The city lights were so many and so bright against the deep India blue of the sky, it was hard to tell them from the stars, but high overhead was the moon, a bright, unclouded disk, as the North Star, beloved of bewildered travellers. Now it twinkled and gleamed above all these scenes of good fellowship and merrymaking with unmistakable approval. Into the uncurtained window of the Corbells' it peeped with a friendly interest and kinder understanding; for it could see that the Winnipeg clock was drawn out from the wall to make it into a full-sized bell, and in it there slept an untutored young girl with Rose Corbett on one side of her and Danny Corbett on the other—her two new friends, who had convoked in her presence and in the presence of each other. She was with shelter, care and sustenance in the event of her mother's death, Rose and Daniel Corbett—the underwriters!

**CHAPTER XXII**

It was Christmas afternoon when Helmi awakened. Christmas afternoon, the very sound of which brings pictures of children playing with trains on living-room floors, initiated with turkey and candy, starry-eyed with presents, numb with surprises and joy. Christmas afternoon! Of all the spicy, perfumed, sparkling glories of afternoon, of the year the most dazzling and glorious; not merely an afternoon or a day that can be marked on a calendar or divided into hours like other afternoons—not that at all Christmas afternoon is an atmosphere, a perfume, a sensation, a feeling, a spiritual experience.

It was Christmas afternoon when Helmi awakened. Number 15 in the North Star Rooming House did not suggest festivity, with its bare, buff walls, dull gray paint, dim dresser, and a large door, with one strip of Japanese matting worn in the middle down to the thresholds. But Helmi was not entirely without a gleam of Christmas for Rose and Danny who were going to the Salvation Army Cantata that night, went singing down the hall.

"Away in a manger, no crib for a bed, The little Lord Jesus had down the street he went."

And it brought to Helmi's mind the Christmas story; and because her heart was never tender than it had ever been, owing to the view and full of the little white veil which covered Lili's face, she loved the little child more than ever, and thought of him and his pale mother as they lay there in the manger with the notes of cattle all around them.

"The stars in the sky looked down where he lay, The little Lord Jesus, asleep on the hay."

Rose, just outside the door, was

The tender leaves of the tea plant are extremely sensitive to climatic changes. That's why Red Rose Tea is packed only in aluminum—so it will never lose strength or flavor through contact with dampness. Every package guarantees to be perfect condition. 6W

**Ocean Fare 12**

Under the British Neutralization Scheme, your relatives and friends can travel at this low rate from Britain to Canada.

**WHITE STAR LINE CANADIAN SERVICE**

singing as she did the lullaby in the hall with dutiful song. Danny was working rather than the hall. Helmi was awakened from her dream by the entrance of a little man with a slender black bag in his hand. He came in without knocking, and stood at the bottom of the bed staring at her critically. He could have been a question Mrs. Corbett had arrived, having seen the Doctor's car at the front door.

Mrs. Tansley, who lived in No. 18 and did the cleaning in the City Hall, and therefore knew something of the correct forms of procedure, had noticed the Department of the happening in No. 18. Dr. Symond came over on Christmas afternoon, when the delicate size of a turkey pulchra in the atmosphere of the house and one has just had to put two leaves in the dining-room table. Dr. Symond was prepared to be quite stern. Indeed, as a representative of the city authorities how could he help being so? These were the unregulated young women who leave their babies on the steps of the City Hall, so to speak, and become entirely too common. Beautiful eyes, or perfectly good gowns, things is easy, if you only follow the rules. Brighten the house; too, cut, false, spread, etc., are Diamond Dye in an hour or less, right over other colors.

**Have Renamed Destroyer**

Implicit Compliment To Canada Seen in Action of Admiralty

An implicit compliment to Canada is seen by officials of the Department of Naval Defence, Ottawa, in the action of the British Admiralty in perpetuating memories dear to the Dominion in the renaming of a destroyer of the Royal Navy.

When Canada decided to rename the destroyers Torbay and Toronto, the two vessels taken over by the Royal Canadian Navy to Vancouver and Chalgallin, it was found that another destroyer of the British fleet already bore the name Vancouver. However, the Admiralty at once offered to rename the ship of the home fleet, to avoid any confusion, and to allow Canada to use this distinctive title.

Advices received at Ottawa headquarters are to the effect that, since April 1, the former British destroyer Vancouver will be the Viny.

**A Stylish Blouse**

It's color these days, that makes a garment stylish. With a different color scheme, the seventh year, make an old or faded waist as smart as any on display. Keep all your clothes stylish—through the quick magic of home dyeing.

Beautiful eyes, or perfectly good gowns, things is easy, if you only follow the rules. Brighten the house; too, cut, false, spread, etc., are Diamond Dye in an hour or less, right over other colors.

 Just Dip to TINT, or Boil to DYE

**THE NEW GERMANY**

Enthusiasm For Military Training Grows Here To Interest In Outdoor Sports

Not the least significant of the characteristics of the new Germany, as contrasted with the old, is its growing interest in outdoor sports. The youth of Imperial Germany were conspicuous for their enthusiasm for military training. The youth of republican Germany, however, are less in school, are worrying their parents because they seem so much more interested in sports and games as they are in their lessons.

This turn of interest is not confined to Germany alone. A group of young men in the United States, whether it is a healthy sign in the national life, 20,000 people should be a football match, as it is now quite common for them to do. The alleged extravagance of German municipalities have been partly directed toward developing public playgrounds, and swimming pools, and baths. Self-respecting German communities are getting the idea that one of the obligations of modern municipal authorities is to provide suitable opportunities for recreation for their citizens. There is a tendency to devote large tracts, 100 acres or more, sometimes on a scale which would do credit to a millionaire, to a series of athletic fields, racetracks for runners, and motor bicycles, a succession of pools and swimming baths—occasionally nearly a hundred yards long—tennis courts, a gymnasium open-air theatre and a large gymnasium, plus a restaurant where all kinds of refreshments are served.

**Wedding Halls in Japan**

Marriage in first-class style in any of the larger Shinto shrines in Tokyo, Japan, costs the equivalent of \$150. The ceremony includes the attendance of high priests, a classical orchestra with flutes, cymbals and pipes, and a restaurant where second-class weddings cost \$25 and so on down to weddings claimed as "plain," "humble," and "plain," the plain style necessitating a shrine rate of 75 cents.

**Saleman For Face Cream**

Learns A Good Lesson

Mr. Vandier, New York, writes: "I was a salesman of creams for healing skin diseases. I was smart, but when I broke out with blotches, pimples and blackheads, I was smart no more with no results. Finally I decided I would have to get at the cause of my trouble. I was smart to find that within a few days after taking your vegetable-liver pills for constipation my skin took on a new healthy look."

**Teeth and Health**

Extending Air Mail Service

If Satisfactory Winnipeg May Be Served in Near Future

Plans are being completed by the post office department for an extension of the air mail service connecting large centres like Montreal and Toronto with the first land stop in transatlantic lines. The contract for the service to Toronto has not yet been actually awarded, but will be in a short time. It will give Toronto delivery of letters mail to and from Europe. If the Toronto service proves satisfactory it is probable that in another year an extension of it as far west as Winnipeg will be attempted.

**Nothing Like It to Relieve Colds**

In formula and action, Bucky's Balm is different from all other cold remedies. In containing coughs and colds, Bucky's Balm is the first one to relieve the throat, chest and lungs. Bucky's Balm is the first one to relieve the throat, chest and lungs. Bucky's Balm is the first one to relieve the throat, chest and lungs.

**BUCKLEYS**

Lead Mining in Yukon

In 1924 the Yukon produced about 2,500 tons of lead or about 2 per cent of the total Canadian production. Shipments take the form of silver-lead ores and concentrates from the Mayo District.

**THE BABY TEST**

How many should there be? Ten little fingers and ten little toes—making twenty in all—and there you have your number. Easy to remember, isn't it?

And should you begin to look for them? About the sixth or seventh month.

And which comes first? As a rule, the lower front teeth, the central incisors, which usually appear first, and then the upper front teeth, the central incisors, which usually appear first.

**Too Much Food**

People These Days Eat More Than They Need

The problem interesting more people than any other in this country today is that of overeating. There is no topic of conversation more general and more practically important to millions of people than how to keep from getting too fat. This is a strange phenomenon in a world that, from the dawn of history, has been hard put to it to get enough to eat. It is probable that there never has been a time when more than half of the world's population was not more or less continuously hungry, but in the United States food is so abundant that everybody must be warned not to eat too much, and there is a protest against reclaiming land test its cultivation should increase an already overabundant surplus of food.

**PERMANENT BUILDING PAPER**

IT TAKES A SHARP BLADE

Healthy beads can be removed most easily with a sharp blade. So, too, can Hercules Permanent Building Paper be cut. It doesn't tear easily.

**For this reason alone, carpenters and builders prefer Hercules. When using, handle it as roughly as you like. Hercules will not tear or crack. Hercules allows greater speed in using.**

**For various purposes, Hercules is made in three grades—light, medium and heavy. All grades are tested and proven wind proof and damp proof. A sample gladly sent on request.**

CHEVROLET

Meet  
Okay  
Karr

Okay Karr says, "Put it there." For he's honest and he's square.  
And he'll treat you fair no matter who you are.  
Every car that bears his name will live up to every claim.  
For the cars are just the same as Okay Karr.

—Okay Karr.

OKAY KARR is the personification of square-dealing and fair representation in the selling of Used Cars. His initials, O.K., are the surest means of identifying sound Used Car values.

For the protection of Used Car buyers, Chevrolet has introduced the O. K. Used Car plan among Chevrolet dealers whose reputation and integrity measure up to the required standard.

Under the O. K. Plan, an O. K. Used Car tag is attached to the car. On this tag are noted all the details of the car's condition, so that the buyer can purchase with the same knowledge and confidence as he would have in a new car. The Chevrolet O. K. Plan applies to Used Cars of all makes.

## USED CARS

with an OK that counts

We have associated ourselves with the O.K. Used Car plan of buyer's protection and invite you to inspect some of the impressive values which we are now offering.

### Royalite No. 8 Well a Producer

An addition to the number of producing oil wells in the Turner Valley field has been made during the past week by the blowing into production of Royalite No. 8, when a flow of wet gas estimated at 17,000,000 cubic feet per day was encountered at a depth of 3,753 feet. Royalite No. 4 well, the outstanding producer of the Dominion, is yielding a steady flow of some 19,000,000 feet of gas per day with a content of over 600 barrels of 73 per cent gravity naphtha.

### Dr. Tury Leaving University

Dr. H. M. Tury who has been president of the University of Alberta since its organization twenty years ago, has tendered his resignation to take effect at the end of the current college year, in order that he may accept the permanent chairmanship of the National Council of Scientific Research with headquarters probably at Ottawa.

The matter of the selection of a successor for Dr. Tury as head of the University will be considered at an early date by the Alberta Government.

Fire destroys the green standing timber, leaving dead trees to dry out as kindling for the second and third fires which generally follow. Thus young growth doesn't get a chance. Human carelessness accounts for most fires in the woods. Only carefulness will save Canada's remaining forests.

### Notice re Syphons

Public Notice is hereby given that all SYPHONS being used for emptying cellars in the Town of Clareholm have been prohibited by order of the Town Council until May 15th, next.

This action was deemed necessary on account of the excessive amount of water in the soil this spring, and the citizens are urgently requested to co-operate in this matter and refrain from using syphons for the period above stated.

It is the intention that this order shall be enforced and the citizens are requested to govern themselves accordingly.

Dated at Clareholm this 23rd day of March, 1928.

Claude J. Amundsen,  
Secretary-Treasurer

## Another PRICE'S Suggestion Maple Nut Cake and Chocolate Layer

THIS unusual, economical Maple Nut Cake will keep fresh for several days, and the Chocolate Layer Cake, made in a little different way with Dr. Price's Cream Baking Powder, is a family favorite too. Try one or both of them today!

(All measurements for all materials are level.)

### MAPLE NUT CAKE

1 cup shortening  
1 cup light brown sugar  
2 eggs  
1/2 cup milk  
1/2 cup flour  
1/2 teaspoon salt  
4 teaspoons Dr. Price's Baking Powder  
1 cup chopped nuts—preferably pecans  
1 teaspoon vanilla extract

Cream shortening, add sugar slowly and yolk of egg and milk and beat well, add flour, salt and baking powder together and add chopped nuts, fold in beaten whites of eggs, add flavoring. Bake in well greased loaf pan in moderate oven 35 to 45 minutes. Cover top with maple syrup and sprinkle with chopped nuts while still soft.

### MAPLE ICING

1/2 teaspoon butter  
2 tablespoons hot milk

DR  
PRICE'S  
CREAM  
Baking Powder

Made from Cream of Tartar, derived from grapes. Bakes the dough perfectly, giving the food fine texture and rich flavor.
